SUMMARY

Passionate front-end developer with a unique entry into the IT field, working closely with a UI Designer to transform creative concepts into functional web solutions. Completed online courses in HTML, CSS, JavaScript and React to enhance technical knowledge. Eager to contribute problem-solving abilities and thrive in a collaborative web development environment. Committed to a fulfilling career driven by hands-on experience and a genuine love for digital innovation.

PROJECT

ANC(E-Commerce) [View Website](#)

- Solely developed an E-commerce website using React, collaborating closely with a designer
- Utilized styled components for styling, and integrated Firebase for the database, handling product data , and user accounts

APR 2023 - JUN 2023 | QUEBEC, CANADA

Continuum(Agency) [View Website](#)

- Demonstrated problem-solving skills by independently resolving challenges encountered during development, such as implementing a scrolling section that works with the mouse wheel, laptop touchpad, or touchscreen.
- Independently developed a responsive website, showcasing adaptability across various devices and screen sizes

FEB 2023 - APR 2023 | QUEBEC, CANADA

Portfolio [View Website](#)

- Implemented new libraries like i18next to handle multiple languages or react-error-boundary to catch errors and display a fallback UI
- Crafted multiple diverse and stunning animations using JavaScript and CSS

JUL 2023 - OCT 2023 | QUEBEC, CANADA
